

- Test out some of the resource tools introduced.
 - Test your email campaign on different clients.
 - Interact with it and see how they work in those different email clients. Take screen shots
 - Make notes of what worked and what didn't based on the client.

Website used: https://www.shiftmailer.com/tools/email-preview?utm_source=chatgpt.com

Issues detected:

Outlook does not support flexbox. Use tables instead.

Outlook ignores border-radius. Buttons/shapes will appear square.

Outlook does not render box shadows.

Outlook ignores max-width. Use a fixed width attribute on tables instead.

Gmail strips all <style> blocks. Use inline styles instead.

Note: website should not be used for mobile viewing, uses 375px rather than 600px
